

Blindshapers - Bay Factsheet

Measuring a bay that has to be in 2 blind tracks

Please also be aware that if there is NO REVEAL we will not make any allowances, so please be accurate with your sizes.

These measurements are needed because the window has to be split into 2 blinds, also measure where the blind is being fitted with a 5" face fix bracket so it will pull it forward of the handles.

If the overall length is more than 4.4m it has to be made from two separate pieces of tracking which is chargeable as two separate blinds.
